BLUEWATERS POOLS & LANDSCAPING

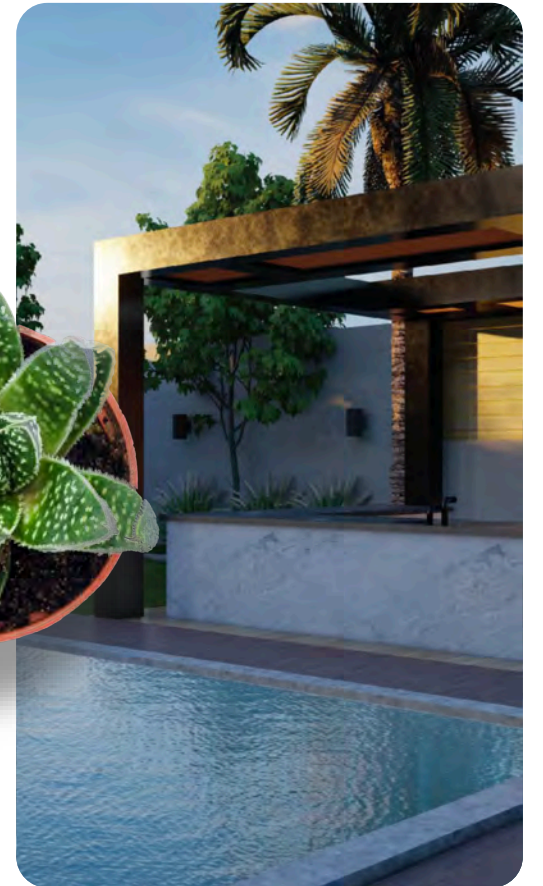

A world of comfort, luxury
and aesthetics

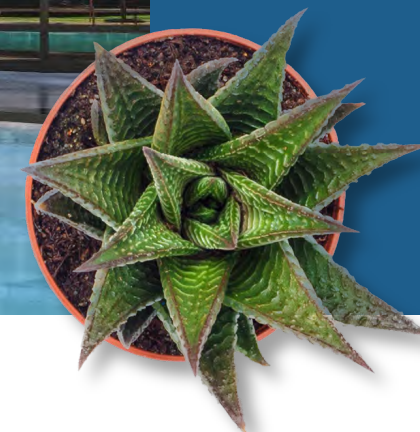

About us

BlueWaters Pools & Landscaping is an acclaimed swimming pool and landscape design and construction company in the UAE, which offers an extensive array of services that can turn your outdoor spaces to a perfect oasis of serenity.

We are a team of high-calibre professionals specialised in the design and construction of swimming pools, hard and soft landscaping, and installation of water features, pergolas, and garden elements. We create a picture-perfect outdoor environment that complements your home and brings a sense of peace and tranquility.

Mission

To contribute towards providing a better, more comfortable, luxurious and enjoyable life.

Vision

To be the first choice in swimming pool, landscaping and outdoor spaces services in the UAE.

Our objectives

- 1- Provide high-quality services in design and construction of swimming pools, creating outdoor spaces, and landscaping, to meet the needs and requirements of our customers.
- 2- Provide a wide range of world-class solutions in building swimming pools, landscaping gardens and creating outdoor spaces, by adopting the best global standards and practices.
- 3- Consolidate our position as a leading company in this field.

Reinventing your outdoor space

At BlueWaters, we are committed to designing and constructing ideal outdoor spaces that give your home a joyful, aesthetic, and tranquil touch.

Whether it's a minimalist or an elaborate design, contemporary, rustic, or something that's uniquely tailored to your lifestyle, we turn your vision into reality through the flawless fusion of our aesthetic designs and functional elements, combined with our extensive experience in the industry and compliance with the highest local and international standards.

Delivering excellence

Commitment to quality

We use high-quality materials and work down to the finest details guaranteeing enduring exceptional customisation that suits the various needs and preferences of our clients across all emirates.

Quick turnaround time

Our simple, straightforward process from consultation to project completion ensures timely and fast turnaround time achieving utmost client satisfaction.

An adept team

Our team includes the industry's most seasoned architects, engineers, designers and technicians who have extensive experience in handling successful projects inside and outside the UAE.

Turnkey solutions

We offer our clients a full range of comprehensive pool and landscaping services, including architecture, design, development, construction, implementation, and maintenance.

Always up to date

We keep a tab on the latest trends in pool and landscaping designing and architecture, and incorporate them to ensure the most suitable modern options for you.

Our Services

01

Swimming pool services

BlueWaters specialises in design, construction, and maintenance of a broad range of bespoke swimming pools including infinity, overflow, skimmer, or any other type the customer chooses.

02

Hard and soft landscaping services

Our professional civil engineers and landscape architects provide a full range of landscaping services that include structural and gardening elements including meticulously selected plants, shrubs, and trees. We ensure that these are implemented according to the best standards using apt high-quality materials such as concrete, marble, granite, porcelain, wood, etc.

Our Services

03

Water feature services

We design and install topnotch water features including traditional and interactive fountains of various sizes, shapes and materials.

04

Shade installation

We provide sophisticated shade solutions customised for our clients' specific needs. We design and install a vast range of pergolas and gazebos with state-of-the-art configurations and materials, including wood, aluminum, steel, glass or concrete, with an aesthetic appeal that complement the surroundings.

Our Process

At BlueWaters, we follow a hassle-free process to assure timely delivery of high-quality projects.

01

Initial meeting

An initial discussion with the client is held to understand their requirements and discuss the specifications of the project to best meet their needs.

02

Site analysis

Our team will visit the site to inspect the available space to be developed and determine the right plan and design that must be used and implemented.

03

Design

We use 2D or 3D modelling to create the project's blueprint, incorporating all its structural elements and intricate details of the design.

04

Revision/ approval

We make the necessary revisions as per the client's feedback and commence with the project once the design is approved by the client.

05

Collaboration until completion

We ensure close collaboration with our clients in every step to avoid any delays and implement the process seamlessly until the project's completion.

Our Projects

Project 1
